TARIFF FORMAT

A. This tariff is divided into the following major sections:

- General
- Section 1: Rate Schedules
- Section 2: Rules
- Section 3: Promotions
- Section 4: Individual Case Basis arrangements

B. Sheet Numbering - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

C. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the CPUC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14.

D. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.(A).
- 2.(A).1
- 2.(A).1.(a).
- 2.(A).1.(a).1.
- 2.(A).1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

E. Check Sheets - When a tariff filing is made with the CPUC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the CPUC.

Schedule 3: Custom Calling and CLASS Features

1. Feature Descriptions

Caller ID with Name and Number - allows a Customer to see a caller's name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE. In areas where Caller ID with Name is not available, Caller ID, which only displays the incoming telephone number, will be substituted.

Call Waiting/Cancel Call Waiting (CCW) - Call Waiting (CW) provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the Customer to place the first call on hold, answer the second call and then alternate between both callers. CCW allows a (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call.

Call Waiting with Caller ID with Name - Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen allowing a Customer to prioritize and or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the callers telephone number, will be substituted.

Schedule 3: Custom Calling and CLASS Features, (Cont'd.)

1. Feature Descriptions, (Cont'd.)

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

Caller Identification Blocking : Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Per Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. After the first time, customers requesting per line blocking will pay a nonrecurring charge for each line equipped with per line blocking. Per line blocking will be provided free to law enforcement and domestic violence agencies and individual victims of domestic violence upon request.

Schedule 3: Custom Calling and CLASS Features, (Cont'd.)

1. Feature Descriptions, (Cont'd.)

Call Forward – Busy - If the Customer's line is busy when a caller tries to call the Customer, Call Forward — Busy will forward the Customer's incoming calls to another telephone number that the Customer selects. If the Customer forwards his calls to a long distance number, long distance charges will apply in accordance with the terms of the plan. The Customer's forwarding number is "fixed" and can only be changed by IDT. To change the Customer selected forwarding number, the Customer must contact IDT.

Call Forward – Don't Answer - When the Customer is not available to answer the phone, Call Forward — Don't Answer forwards incoming calls to another telephone number the Customer selects. If the Customer forwards the Customer's calls to a long distance number, long distance charges will apply in accordance with the terms of the plan. Call Forward —Don't Answer is available by subscription only. The Customer's forwarding number is "fixed" and can only be changed by IDT. To change the Customer selected forwarding number, the Customer must contact IDT.

Schedule 3: Custom Calling and CLASS Features, (Cont'd.)

1. Feature Descriptions, (Cont'd.)

Anonymous Call Rejection (ACR) - Anonymous Call Rejection (ACR) allows a customer to reject calls from callers who have blocked the display of their telephone numbers from a Caller ID device. ACR discourages anonymous calls, since callers must allow their numbers to be displayed in order to reach you. When a customer activates Anonymous Call Rejection, callers who have blocked the display of their numbers will hear an announcement telling them that the Customer are not accepting blocked calls. They will be instructed to hang up, unblock their number and dial again if they wish to reach you. A customer will hear a confirmation announcement whenever the Customer activate or deactivate the Anonymous Call Rejection feature.

Call Trace – allows Customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the Customer can use this application to combat nuisance calls. This service may be ordered on a Monthly or per trace basis.

Call Forwarding Variable - Call Forwarding Variable allows the Customer to choose to reroute incoming calls to another specified telephone number. The Customer must activate and deactivate this feature.

Each bill shall also include the following statement:

"This bill is now due and payable; it becomes subject to a late payment charge if not paid within 30 calendar days of the presentation date. Should you have any questions regarding this bill, please request an explanation from IDT America, Corp. If you believe you have been incorrectly billed you may file a complaint with the California Public Utilities Commission, Consumer Affairs Branch, 505 Van Ness Avenue, San Francisco, California 94102. A. Advance Payments

At the time an application for service is made, an applicant may be required to pay an amount equal to one month's service charges and/or the service connection and/or equipment charges which may be applicable as well as any nonrecurring charges for any required special construction. The Company will not require advance payments for usage. The advance payment made by the Customer is credited to the Customer's account on the first bill rendered.

B. Deposits

- .1 Requirement: The Company may, at its sole discretion, require an applicant or an existing Customer to post a guarantee for the payment of charges as a condition to receiving service or additional services. The Company reserves the right to review an applicant's or a Customer's credit history at any time to determine if a deposit is required.
- .2 Nondiscrimination: Deposits will not be required by the Company based on race, sex, creed, national origin, marital status, age, number of dependents, condition of physical handicap, source of income, or geographical area of business.
- .3 Amount: The amount of the deposit shall not exceed twice the estimated average monthly bill for the class of service for which the deposit is to be applied. Interest on deposits will be set at the 3-month commercial paper rate published by the Federal Reserve Board, except no interest will be paid if the Customer has received a minimum of two discontinuance of service notices in a 12-month period. The fact that a deposit has been made neither relieves the Customer from complying with the Company's regulations on the prompt payment of bills on presentation nor constitutes a waiver or modification of the regulations of the Company providing for the discontinuance of service for nonpayment of any sums due the Company for services rendered. In the event a customer requests services in addition to basic service, the average bill will reflect the aggregate services requested by the Customer.

No. 15 Measurement of Service

When charges for calls are mileage sensitive, airline mileage is computed as described below.

Calls are measured and rounded to the higher full minute from the serving wire center of the Customer's originating location to the serving wire center of the destination of the call, regardless of Company routing. The distance between the serving wire center origination point and that of the destination point is calculated by using the "V" and "H" coordinates as defined by Bell Communications Research (BellCore) and NECA Tariff FCC No. 4 in the following manner:

Step 1 Obtain the "V" and "H" coordinates for the originating and terminating wire centers.

Step 2 Obtain the difference between the "V" coordinates of each of the serving wire centers. Obtain the difference between the "H" coordinates.

Step 3 Square the differences obtained in Step 2.

Step 4 Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 Divide the sum of the squares obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results.

Step 6 Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the airline mileage of the call.

Included in the magistrate's writing shall be a finding that there is probable cause to believe not only that the subject telephone facilities have been or are to be used in the commission or facilitation of illegal acts, but that the character of such acts is such that, absent immediate and summary action in the premises, significant dangers to public health, safety, or welfare will result.

C. INC Demarcation Point

- .1 The Intra building Network Cable (INC) demarcation point separates the building owner's responsibility to provide INC from the Customer's responsibility to provide inside wire, standard jacks, and customer premises equipment. This demarcation point designates the end of the INC provided by the building owner and the beginning of simple or complex inside wire provided by the Customer.
- .2 The INC demarcation point is located at the distribution terminal(s) on each floor in a multi-story building, except as set forth in Paragraph 3 below and B4 preceding.
- .3 Where there is no intra building network cable or it is in a single-story building, the INC demarcation is the Company's Local Loop Demarcation Point.

D. Inside Wire Demarcation Point

- .1 The inside Wire Demarcation Point is located where Customer premises equipment (CPE) is connected to the inside wire. This demarcation point designates the end of the inside wire and the beginning of the CPE facilities.
- .2 The Inside Wire Demarcation Point separates the inside wire vendor's responsibility from that of the CPE vendor. This demarcation point, where the Company is the vendor of choice for inside wire repair and the CPE trouble isolation, begins where the Customer's inside wire connects to the INC. Where there is no INC, the Inside Wire Demarcation Point is the MPOE.

E. Continuous Property

- .1 Continuous Property is land which is
- (a) wholly owned by a single individual or entity, regardless of whether the owner leases¹ all or a portion(s) of the property to another and
 - (b) which contains, or will contain, multiple buildings where all portions of the property may be served without crossing a public thoroughfare² or the property of another.
- .2 There are three basic types of Continuous Properties:
- (a) Single-tenant commercial in which one owner or tenant occupies all buildings.
 - (b) Mixed commercial and residential (e.g., building with both commercial and residential space or campus-type configurations such as colleges and military bases) in which a mixture of business and residential uses exists.
 - (c) Multi-tenant commercial and/or residential in which several tenants occupy a building individually on a per-floor or per-section basis.
- Single family homes and properties within which a portion(s) of the land is owned by separate entities and portion(s) is owned by the entities in common³ do not constitute Continuous Property.

¹ The property retains its character as a Continuous Property regardless of whether the owner or a lessee (who wholly leases the property from the owner) sublets a portion(s) of the property to another, e.g., apartment buildings or complexes. Condominiums also are Continuous Property.

² A "public thoroughfare" is a street, road, or other means of passage across a property which is not subject to restrictions on ingress, egress, or boundaries. Includes streets, roads, and homes in gated communities.

E. Continuous Property, (Cont'd.)

- .3 Continuous Property - Point of Demarcation
- (a) For Continuous Property, regardless of use, the Company's Local Loop Demarcation Point will be at the appropriate main distribution terminal as determined by negotiations between the property owner and the Company. Where an agreement cannot be reached, the Company will designate the Local Loop Demarcation Point location.
- (b) It is the property owner's responsibility to provide and maintain INC within and between buildings on a continuous property. The Company may, at the Customer request and expense, provide INC.
- .4 Where an owner of Continuous Property requests additional Local Loop Demarcation Points or changes an existing local loop demarcation point, the owner will be required to pay for any additional network cable and facilities required through special construction agreements set forth in this tariff, except as provided in the preceding paragraph.
- .5 The INC and Inside Wire Demarcation Points are located as described above.
- .6 At the request of a property owner, a Company may waive the designation of a single Local Loop Demarcation Point for a Continuous Property if, due to the unique characteristics of the property, a hardship would be created for the property owner and/or the Company. Examples of such Continuous Property include (a) national, state and local parks, beaches, highways, harbors and similar publicly-owned property and (b) railroad rights-of-way and extensive, privately-owned tracts of land with developed communities (e.g., the City of Irvine) and similar privately-owned property. The Company will treat land within the boundaries of privately-owned property under (b) above as Continuous Property, provided that it had the characteristics of Continuous Property, e.g., (a) it is wholly leased by a single individual or entity and (b) it contains or will contain multiple buildings.

This paragraph is not intended in any way to waive the unbundling of INC in each building.
